Holidays - 10 observed annually

Supporting Our Local Fire, EMS Agencies

By Rep. Joe Emrick

Grant funding has been awarded to critically important first responder companies in the 137th District under the PA Fire Company and Emergency Medical Services Grant Program.

Seven fire companies and ambulance squads in the 137th District are recipients of grants administered by the Pennsylvania Emergency Management Agency and Office of the State Fire Commissioner.

Our first responders make sacrifices for us every day to serve and protect our community. I am grateful this funding has been awarded to those who ensure the safety of our local residents through their service.

Grants awarded within the 137th District are:

- Hecktown Volunteer Fire Company No. 1, \$16,322.02.
- Nancy Run Fire Company of Butztown, \$8,394.00.
- Palmer Municipal Fire Department, \$16,322.02.
- Suburban EMS Inc, \$28,143.00.
- Tatamy Fire Company, \$12,223.63.
- Upper Nazareth Fire Department, \$15,030.95.
- Vigilance Hose Company No. 1, \$16,106.84.

The funding for these grants comes from an ongoing program created by the Legislature and administered by the Pennsylvania Emergency Management Agency and Office of the State Fire Commissioner (OSFC). All funding comes from slot machine gaming proceeds, not General Fund tax revenue.

Looking to Stock Fish in Your Private Pond or Stream?

By Rep. Joe Emrick

The PA Aquaculture Advisory Council is alerting property owners who normally stock their private ponds or streams that last year's drought caused significant trout inventory shortages across the eastern seaboard.

As a result, Pennsylvanians may end up having to look out of state to get their trout this year. The council is reminding them that in addition to filing a Notice of Stocking, written permission from the PA Fish and Boat Commission must be obtained before those out-of-state fish are stocked in the Commonwealth. Directions on both the Notice of Stocking and getting written permission can be found here.

It is important that residents perform due diligence, protect our waters and wildlife, and avoid introducing diseases and invasive species into our communities.
