SENATOR ROSEMARY BROWN

Pennsylvania's 40th District

Serving Lackawanna, Monroe, and Wayne Counties

Happy Birthday, Raymond!

By Senator Rosemary Brown

Recently, we celebrated a major milestone in the life of Raymond Francis Benensky, a WWII veteran and war hero, as he turned 100 at the Gilbert Legion. His courageous service, recognized with two Purple Hearts and two Bronze medals, is an inspiration to us all. The celebration was a touching tribute, complete with hundreds of handmade cards from students, and numerous presentations and expressions of gratitude. Happy Birthday, Raymond! May your special day mark the beginning of another year filled with joy and well-being

Honoring 80 Years of Service: Shawnee Fire Company's Celebration

By Senator Rosemary Brown

I was honored to attend the Shawnee Fire Company's 80th Anniversary Celebration Dinner last weekend, recognizing the incredible dedication of these firefighters and their families. Their hard work, selflessness, and commitment to protecting our communities—both within the Shawnee Fire territory and through mutual aid across counties—deserve our deepest appreciation.

Under the leadership of Chief Jason Witcraft and Assistant Chief David Timko—who has proudly served for 35 years—the company continues to uphold the highest standards of community service and professionalism.

If you're able, please consider supporting them with a donation to help ensure they have the resources needed to keep us safe.

Thank you to all the brave men and women of Shawnee Fire Company for your service!

Tips to Protect Your Family in a Power Outage

By Senator Rosemary Brown

More than just an inconvenience, power outages can also present safety threats. In extreme cold temperatures, do not use a gas stove or oven to heat your home as it increases the risk of carbon monoxide poisoning, fires and burns. It's best to go to a community location with power – particularly for those at greatest risk.

Another concern is keeping food at the proper temperature. Keep freezers and fridges closed; a fridge will keep food cold for about four hours, and a full freezer will maintain the temperature for about 48 hours. Dispose of food if the temperature exceeds 40 degrees. Find out how long refrigerated medication can be stored at higher temperatures and contact your doctor for a new supply if necessary.

Generators can minimize the challenges associated with power outages, but they present their own risks if not used properly. Read more about how to use them safely to prevent carbon monoxide poisoning and other hazards.
