Join us as we hear from Dr. Megan Rothenberger of Lafayette College about the removal of several small dams and reintroduction of freshwater mussels in the lower Bushkill Creek in Easton, PA. This project has provided a valuable opportunity to advance scientific understanding of ecosystem response to stream restoration. Multi-disciplinary research has involved the collection of more than 14 consecutive years of ecological monitoring data at seven sites upstream and downstream of the Bushkill Creek dams and three free-flowing reference sites located upstream of all dams. This talk will summarize what has been learned about the effectiveness of these restoration efforts and how they might be used to improve future actions. Registration is required.
