

Remembering the Life and Legacy of Charlie Kirk

By U.S. Senator Dave McCormick

This week, I joined my colleagues to remember and honor the life of our friend, Charlie Kirk. A devoted husband, caring father, and an inspiration to many, Charlie touched countless lives through his example. We stand united in prayer for Charlie and his family. His incredible legacy will never be

Praying for the Fallen Officers, Their Families and Loved Ones, and the York County Community

Earlier this week, tragedy again struck the York County community when a shooter opened fire on five law enforcement officers attempting to serve a warrant. I'm absolutely heartbroken by this horrific incident, and my deepest condolences go out to the families and friends of these courageous officers who put themselves in harm's way for us. Dina and I are praying for the officers' families, their colleagues, and the entire York community during this devastating time.

Meeting with Tech and Defense Leaders on Pittsburgh's "AI Avenue"

I recently met with the leaders of Pittsburgh's many impressive robotics and technology companies that are helping Pennsylvania lead the nation in AI development and defense reindustrialization. Many of these companies strategically chose Pittsburgh for their headquarters due to the region's proximity to over half the country's population, plentiful natural resources, vast skilled labor force, world-class higher education institutions like Carnegie Mellon University and the University of Pittsburgh, and an affordable cost of living.

Pittsburgh Technology Council Roundtable

It was truly inspiring to meet with so many titans of innovation in the defense robotics and AI development fields, all of whom have strategically chosen Pittsburgh as their home base for the many benefits the city provides. I'm eager to support the various cutting-edge AI and robotics companies in Pittsburgh, and to highlight the incredible growth and innovation happening here along "AI Avenue."

"The rise of AI, autonomous systems, and robotics has eroded the technological advantages the United States has historically used to deter aggression from near-peer competitors like China and Russia," said Brian Kennedy, who leads the Defense Robotics and AI Coalition at the Pittsburgh Technology Council. "As that advantage diminishes, the world becomes increasingly dangerous. The innovations being developed in Western Pennsylvania are now essential to the Department of Defense's core mission: To provide the military forces needed to deter war."

Lovelace AI Meeting

There is incredible innovation happening in Pittsburgh's Bakery Square, quickly becoming known as "AI Avenue." I recently met with CEO of Lovelace AI, Andrew Moore, to learn how they're combining mathematics with AI systems to help solve complex problems in real time. Their AI technology is capable of assisting our military in making data-informed decisions FAST by utilizing AI models to analyze data points and make live-saving recommendations.
