Rep. Wild Introduces Legislation to Protect IVF

Rep. Wild Introduces Right to IVF Act, Additional Reproductive Health Protections

On Wednesday, I led a group of my colleagues to introduce the Right to IVF Act, a new package of bills that would protect every American's right to use fertility treatments and expand opportunities for insurance coverage. This bill would also increase veterans' access to IVF and other assisted reproductive technologies.

As a mother, I know that the decision to have a child is a deeply personal one. No judge or politicians should dictate how or when Americans start or grow their families. We have already seen extremists attack fertility treatments like IVF, and we must pass this legislation to protect this pro-family treatment nationwide.

Rep. Wild Celebrates Indian Heritage Day in Allentown

On Sunday, I had the opportunity to celebrate the 7th Annual India Heritage Day in Allentown. I have attended this event every single year, and always look forward to meeting the various vendors and seeing their handmade goods and delicious food. I also got to learn more about the history of Indian kites – the theme of this year's event!

I truly believe that our diversity makes our community and our country strong. The Greater Lehigh Valley is home to so many different ethnic and cultural groups, and their unique contributions to the our area have helped shape it into the place I am proud to call home. It is the honor of my life to represent this community, and everyone who lives there, in Congress.
