Renewing Cooperative Effort Regarding Karst Geology in Northampton County

By Senator Scavello

NORTHAMPTON COUNTY - On Monday in Harrisburg, I along with PA State Rep. Ann Flood and PA State Rep. Joe Emrick held a meeting to discuss issues regarding the Bushkill Creek watershed in Northampton County due to the karst geology of the area. The geology of the watershed and surrounding area make is extremely prone to sinkhole formation. We sought to renew a cooperative effort at the state level to address the issues in the watershed. Lower Mount Bethel Township Supervisor John Mauser and Nathan Pritchard from the Northampton County Conservation District presented information on the topic to various state agency representatives. Some of the agencies in attendance were PA DEP, Pennsylvania Department of Transportation (PennDOT), Pennsylvania Department of Conservation and Natural Resources, and the Pennsylvania Fish and Boat Commission.

The impact of this problem will impact or has already impacted various economic and environmental assets within the county. These include Route 33 and two major bridges along it, a municipal wastewater treatment plant, regional trail system, a Norfolk Southern rail line and bridge, the Chrin Commerce Centre, and numerous homes and businesses.

If you would like to watch the meeting and learn more about the karst geology issue you can watch it here: <https://www.senatorscavello.com/2021/09/27/sinkhole-meeting/>
