

a WILD IN REVIEW

Rep. Wild Discusses Lowering Health Care Costs with Protect Our Care

By

Since I first came to Congress, one of my top priorities has been bringing down health care costs for members of our community. On Sunday, I joined Protect Our Care to highlight the progress we've made to lower prescription drug costs and discuss the significant work we still have to do.

Last Congress, I was proud to help pass the Inflation Reduction Act, which lowered the price of insulin to \$35/month for individuals on Medicare and capped annual prescription drug costs at \$2,000 for Medicare recipients. While this is a major step forward, I believe that these low costs should be available to all Americans, not just those on Medicare. I'll continue working to make this a reality and ensure that in the wealthiest country in the world, everyone can afford the lifesaving care and medications they need.

Rep. Wild Joins Greater Lehigh Valley Chamber of Commerce for Manufacturing Forum

By Congresswoman Susan Wild

On Thursday, I joined the Greater Lehigh Valley Chamber of Commerce for their Lehigh Valley Manufacturing Forum. At the event, I had the opportunity to speak with so many wonderful manufacturers, business owners, and leaders in our community and provide them with an update of the work I'm doing in Congress to support local manufacturing and bolster our local economy.

On top of supporting Made in America policies that put our local manufacturers first, I'm working to bring federal resources home to support our small businesses, improve our aging infrastructure, and ensure our manufacturers have the tools they need to thrive. The Greater Lehigh Valley has a rich history of manufacturing excellence, and I'm committed to making sure our region is top of mind for federal legislators as they allocate resources and promote modern manufacturing.
