When it comes  
 to housing,

little things  
 shouldn't make  
 a difference.

If you have children and a landlord refuses to rent to you, requires a higher security deposit, limits the use of facilities, or says you can only live in certain areas of a housing complex... that could be discrimination. And housing discrimination is against the law.

## Help Your Trees Stay Healthy During Winter

By DCNR

BUSHKILL - Trees still need our help, even though they are dormant in the winter. Help your trees stay healthy over the winter months by:

Watering – If there is a dry spell in the weather with no precipitation, water your trees once or twice a month. Trees still need water while dormant and cold – dry air can dehydrate an evergreen tree faster than its roots can replenish it.

Mulching – Freeze/thaw cycles can cause cracks in the soil, exposing and drying out your tree's roots. Mulch acts as a blanket, insulating and regulating the temperature of the tree and preventing moisture loss.

Pruning – Trees need to be pruned to enhance their beauty and function – this is made easier in the winter by a lack of leaves and harder, frozen ground. Another benefit of pruning in winter is that you can avoid spreading disease and fungi that are active in the spring and summer

Giving your trees a checkup – Inspect your trees for insect or other damage. Make sure rock salt is not used near trees, as it damages their roots.

Visit the DCNR website for additional information and resources for caring for your trees.
