Da Vinci Science Center to Announce Major Milestones for New Allentown Facility

By Caroline Scutt

ALLENTOWN, PA.— The Da Vinci Science Center will provide an update on progress developing the new Science Center in downtown Allentown during a virtual update:

Wednesday, April 14th at 8:30am

https://zoom.us/webinar/register/WN_8Wk35GfRzSpSoh17RY8Dg

After registering, you will receive a confirmation email containing information about joining the webinar.

The update will include fundraising progress, and the launch of a comprehensive campaign to support the next chapter in the Science Center's development will be announced. A series of photorealistic renderings of the state-of-the-art exhibit halls will be unveiled and local officials will be on hand to share their support for the project and the significant contributions it will make to the Lehigh Valley region as a visitor destination and Center of Excellence in STEAM – Science, Technology, Education, Arts and Math – education.

"The City of Allentown is pleased to support the Da Vinci Science Center project because it is another great example of how the city continues to move forward despite the challenges presented by the pandemic," said Mayor Ray O'Connell, who will be speaking at the update. "The new Science Center will have a positive economic impact, attracting visitors to our downtown and more importantly will be a major educational resource for the residents of Allentown and add to the growing mix of venues that will make Allentown an even better place to live, to work, to learn, to play and to invest."

The Science Center also will recognize those who are bringing the new facility to life including the design and engineering team, construction manager, and legal team.

"The ongoing pandemic has certainly underscored the importance of science learning and its central role in lives, as well as the urgent need to prepare a skilled workforce for new and emerging roles in STEM fields and in the economy of the 21st century," explained Lin Erickson, Executive Director and CEO of Da Vinci Science Center. "Science centers play a critical role nurturing the next generation of curious, informed, and critical thinkers, and we are looking forward to being able to offer a state-of-the-art facility that will help develop the next generation of inspired problem solvers and innovators who will fuel our regional economy and solve the global challenges of our times."

Join us as we continue to work together to assemble the pieces of the puzzle to create a new science center for the Lehigh Valley. A detailed press release, videos, and renderings will be shared at the announcement.
