Grant-funded And Free To Participants, Program Equips Workers With Foundational Skills For A High-paying Career.

By Tari Carnahan

BETHLEHEM, PA - If you are a problem-solver, enjoy fixing things and working with your hands, then a high-paying career in Industrial Maintenance may be for you.

Northampton Community College (NCC) is excited to offer a 10-week, accelerated Industrial Maintenance Training Program, Mondays through Thursdays, October 3 - December 8, 9:00 a.m. - 3:00 p.m., at the Fowler Family Southside Center in Bethlehem. Funded by the PA Department of Community and Economic Development (DCED), the program is FREE to qualified candidates.

In the program, participants will learn the foundational skills of industrial maintenance that will equip them for entry-level positions or apprenticeships in this growing field. Foundational skills being taught include blueprint/schematics reading, electrical and mechanical concepts, trouble-shooting, and more. Participants will also earn their OSHA-10 certification.

SPOTTED
LANTERNFLY
SIGHTINGS****Watch for Swarms of
Spotted Lanternfly**

By State Rep. Joe Emrick

SLATE BELT - Spotted Lanternfly, having grown into adults after storing up the summer warmth and energy, are beginning to swarm. They hunt for tall structures such as trees and houses in preparation to launch themselves into the wind, look for food and find a safe place to lay their eggs. The Spotted Lanternfly poses no harm to humans; however, they disrupt outdoor activity and feed off several types of trees.

These swarming events give researchers a good idea of where large populations might exist today, and where egg masses will likely be found in the winter months. Reporting these swarms via the Public Reporting Tool will aid researchers and treatment staff alike in the effort to slow the spread of this invasive insect.
