## 40th Fall Harvest & Sawmill Show

Continued from page 1

to see how the tree becomes finished lumber is amazing. Also are all the vendors who set up shop for the two day event with their gas and steam engines operating like back in the day producing things like things made out of yarn and feed grinders making flour. And I can't pass up the fresh peanut roaster vendor running two roasters all day.

There is always a new attraction, this year it was a 'York Shipley Boiler,' the dryback boiler is built on the concept of center-firing, where the furnace is placed in direct center of the pressure vessel. This furnace location provides an increased level of water circulation, which leads to a more balanced thermal distribution in the vessel.

### Armageddon

Fall is here again and I hear that winter will be arriving within a couple months too. Who would have thought that after the beautiful spring and summer we just experienced that it could turn cold and blustery? There have even been rumors to the effect that water will turn to ice and destroy everything in its path. I have seen scientific evidence that this is part of a cycle the earth has experienced in the past but my short term memory does not have any recollection of it. What can we do to prepare for this impending Armageddon so that we do not perish and our homes are not damaged or destroyed?

Close the storm windows if your home has them. Screens pose no protection against the polar vortex. Clean out the rain gutters because after the thermal shock forces the trees to shed their leaves, they will end up in your gutters and clog up the works. When gutters overflow, the foundation gets deluged with so much water it eventually gets through and ruins things in the basement. Take the hose off the outside faucet. Doing

this will probably avert another disaster if the weather ever warms up again and you want to wash the car. You also won't have to wake up one night this winter after hearing a strange sound and then realize it was your garden hose exploding under the several tons of pressure exerted by water expanding as it turned to ice inside your hose. Have your heating system checked and serviced and be sure to have some fuel to power your heating system. Don't run your oil tank to the last gallon. Even if you don't use all the fuel this year and warmer weather strikes, it is likely that the cycle will repeat itself and you can use it later. Get some warm comfortable clothes to wear inside before everyone else realizes cold weather is coming and they are sold out. Then wear them inside and turn the thermostat to a reasonable temperature like 68° and get acclimated to it. This will save money and reduce the shock of going from a 75° home out into frigid temperatures. Walking around the house dressed for the Neoproterozoic era during the new ice age is just not practical.

There are several other important preparations needed to survive this frigid intrusion but they are more personal and involve coffee or hot chocolate and bunny slippers so everyone needs to use the above information as a starting point and customize their individual plan to suit their lifestyle. Forewarned is forearmed.

### Green Knights Sr. Day

Continued from page 1

#### Football

**Caleb Ceraul:** Caleb is the son of Dean Ceraul. He has participated in football since 9th grade, and is a team captain this season. Caleb is also a member of the track and field team. He plans to attend Northampton Community College to become a certified lineman.

**Cory Cockley:** Cory is the son of Jennifer and Kevin Keat and Ron and Lauren Cockley. He is a varsity letter winner in football, and plans to attend college to study civil engineering.

**Conor Fehr:** Conor is the son of Donna and Craig Fehr. He is on the basketball team, and a team captain on the football team. Conor plans to attend college to study sports communication, and hopefully continue his football or basketball career.

**Nick Gennusa:** Nick is the son of Joseph and Danielle Gennusa. He is a member of the football team, baseball team, and peer mediation. Nick plans to attend college to study finance.

**Matthew Guerriere:** Matthew is the son of Faith Hulse and Mark Pugh. He has been on the football team for 4 years, and was crowned homecoming king this year. Matthew plans to pursue a career as an underwater welder.

**Gabriel Hahn:** Gabriel is the son of Christopher Holland, Janelle Bader, and Chrissie Holland. He is a team captain, and leadership council member on the football team, and won the business award. Gabriel plans to attend Bloomsburg University.

**Derek Herfurth:** Derek is the son of Sandy and Lou Herfurth. He is a 3 year member of peer mediation, a 4 year member of aevium club, where he has served the last 2 years as an officer. Derek has played basketball for 8 years and football for 13 years. He plans to attend college to major in nursing.

**Maxwell Houck:** Maxwell is the son of Ann and John Houck. He is a member

Hannah Hine

Hunter Weaver

of peer mediation, Avedium, national honor society, and has been awarded the Bausch & Lomb science award, and the alumni award. Maxwell plans to attend college to study computer science.

**Denis Kenadiev:** Denis is the son of Ave and Rumen Kenadiev. He is a 2 year varsity letter winner on the football team, and plans to attend college to study finance.

**Jacob Kunsman:** Jacob is the son of Shane and Kristin Kunsman. In addition to being on the football team, Jacob is the student government president, earned an academic excellence award for outstanding achievement in science, and is a 3 year member of the 94% and above club. Jacob plans to attend college to major in biochemistry, and continue for a master's degree and possibly a doctoral degree in this field.

**Morgan Layton:** Morgan is the son of Roy and Magi Layton. He has participated in football since the green & white. Morgan plans to attend Northampton community college, and then St. Luke's Nursing School to obtain a master's degree in nursing with a specialty in anesthesiology in order to pursue a career as a nurse anesthetist.
